

YouTube Management System

Introduction

This project is a command-line based YouTube Management System implemented in C. It allows users to perform various operations related to YouTube channels, such as creating new channels, watching videos, searching, subscribing, and accessing records. The system demonstrates the use of structures, file handling, and dynamic user interactions.

Concepts used : structure , file handling , loops, pointer, functions, conditional statements

Features

1. Create New YouTube Channel

Allows users to create a new YouTube channel by providing details such as:

- ❖ Channel Name
- ❖ Category
- ❖ Owner's Name
- ❖ Aadhar Number
- ❖ Account Opening Date
- ❖ Social Media Information (Instagram and Gmail)
- ❖ Address (Village, City, State, Country, PIN)
- Saves the entered details into a file named create.txt.

2. Watch YouTube Videos

Provides options to watch different types of videos:

- Long Videos: Categorized into Music, Cartoons, Cricket, and Gaming.
- Shorts
- Mood-based recommendations (Happy or Sad moods).
- Reads video content or recommendations from respective files (ytmusic.txt, ytcartoon.txt, ytcricket.txt, ytgaming.txt, ytshorts.txt, happymood.txt, sadmood.txt)

3. Search Something

- Allows users to search for specific content within the file search.txt.
- Displays the matched content if found.

4. Maximum Subscriber's YouTube Channel Names

- ❖ Displays the channels with maximum subscribers by reading data from maxsub.txt.

5. Maximum Likes YouTube Videos

- ❖ Displays the most-liked YouTube videos by reading data from mostlikeyt.txt

6. Compare Two YouTube Channels

- ❖ Compares two YouTube channels and shows the details stored in the file cmpytchannels.txt.

7. YouTube Records

- ❖ Displays various YouTube records by reading the data from ytrecords.txt.

8. Subscribe to YouTube Channels

- Displays a predefined list of YouTube channels.
- Allows users to subscribe to a channel by entering its name.
- Subscribed channels are appended to the file subsclst.txt.

9. Exit

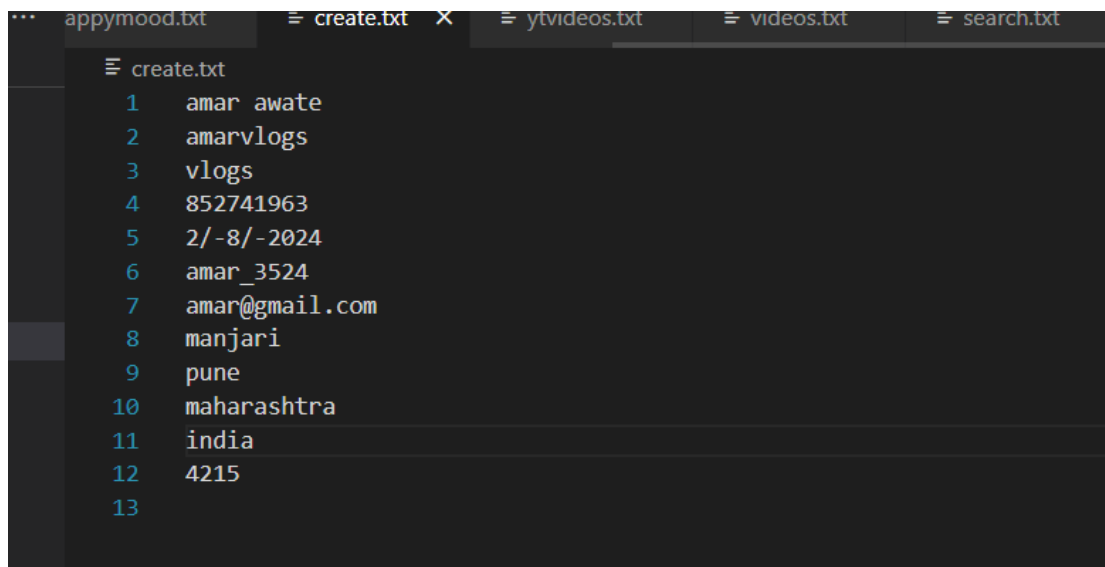

- ◆ Exits the program.
-

```
*****welcome To YouTube*****
Hello Guy's, what do you want to do?
1. Create New YouTube Channel
2. Watch YouTube videos
3. Search Something
4. Maximum Subscriber's YouTube channel Names
5. Maximum Likes YouTube videos
6. Compare Two Youtube Channels
7. YouTube some Records
8. Subscribe To Youtube Channels
9. Exit
```

1) Press 1 to create a new YouTube channel

```
*****Welcome To YouTube*****
Hello Guy's, What do you want to do?
1. Create New YouTube Channel
2. Watch YouTube videos
3. Search Something
4. Maximum Subscriber's YouTube channel Names
5. Maximum Likes YouTube videos
6. Compare Two Youtube Channels
7. YouTube some Records
8. Subscribe To Youtube Channels
9. Exit
Enter your choice: 1
Enter Your Name: amar awate
Enter Your YouTube Channel Name: amarvlogs
Enter Your YouTube Channel Category: vlogs
Enter your Aadhar No: 852741963
Enter Account Opening Date (dd/mm/yyyy):02-08-2024
Enter Your Instagram ID: amar_3524
Enter Your Gmail ID: amar@gmail.com
Enter Your Village: manjari
Enter Your City: pune
Enter Your State: maharashtra
Enter Your Country: india
Enter Your PIN:4215
Your channel has been created successfully.
```

This data will be stored in the create.txt file

The screenshot shows a code editor with several tabs: appymood.txt, create.txt (active), ytvideos.txt, videos.txt, and search.txt. The active tab, create.txt, contains the following text:

```
1  amar awate
2  amarvlogs
3  vlogs
4  852741963
5  2/-8/-2024
6  amar_3524
7  amar@gmail.com
8  manjari
9  pune
10 maharashtra
11 india
12 4215
13
```

2) If I click on the 2nd menu option to watch YouTube videos, it should display like this

```

*****welcome To YouTube *****
Hello Guy's, What do you want to do?
1. Create New YouTube Channel
2. Watch YouTube videos
3. Search Something
4. Maximum Subscriber's YouTube channel Names
5. Maximum Likes YouTube videos
6. Compare Two Youtube Channels
7. YouTube some Records
8. Subscribe To Youtube Channels
9. Exit
Enter your choice: 2
----> a. Watch long videos
----> b. Watch Shorts
----> c. My mood is
----> e. Exit
What do you want to watch: a
-----> p. music & entertainment
-----> q. cartoon
-----> r. Cricket
-----> g. Gaming Videos
Enter your choice : p
Music & Entertainment
-----

Alone x Faded (Slowed+Reverb+Mashup) | Chill Music
https://youtu.be/nXfy8G3JYdM?si=ed1e_Werh2I3SaNr

```

When I try to click or move the cursor over a YouTube URL, the 'Follow Link' option appears.

When I click on 'Open,' it directly plays the video on YouTube.

3) When I try to search for something, if the content is found in the search.txt file, it will display 'Search found'; otherwise, it will display 'Not found'

```
